

## AKLIMDA!

Üç basamaklı sayılardan 10 ve 10'nun katı olan sayıları zihinden çıkarırken eksilenin onlar basamağındaki rakamdan çıkanın onlar basamağındaki rakamı çıkarırız.

Örnek:  $8\bar{7}4 - \underline{3}0 = 844$

Üç basamaklı sayılardan 100 ve 100'ün katı olan sayıları zihinden çıkarırken eksilenin yüzler basamağındaki rakamdan çıkanın yüzler basamağındaki rakamı çıkarırız.

Örnek:  $\underline{6}52 - \underline{4}00 = 252$

Aşağıda verilen çıkarma işlemlerini zihinden yapalım.
